

Height & Wingspan

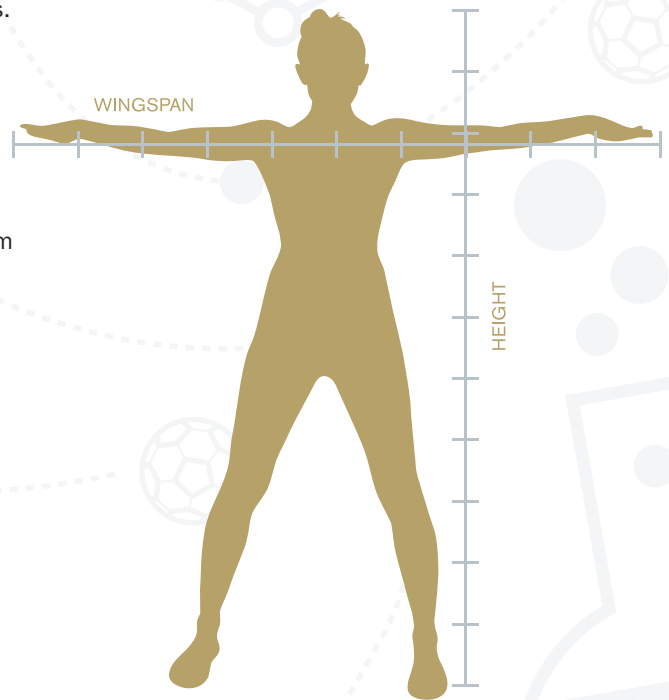

Description: The average height of professional soccer players is 71 inches. Their wingspan, however, can be different from their height. Wingspan is the distance between a player's outstretched fingertips. Below, you will explore whether your height and wingspan are the same or different.

Compare your height to your classmates and record your results on the graph below.

Activity: Stretch out your arms to the side and measure your wingspan (from fingertip to fingertip). Stand up straight and measure your height from the bottom of your foot to the top of your head.

My wingspan measures _____ inches.

My height measures _____ inches.

Class - Height vs. Wingspan
